

THE FALSTAFF BREWERY

St. Louis, MO

DESIGN CONCEPT

This facility is a place of luxury, leisure, and comfort, utilizing complementing colors, along with soothing neutrals to promote its relaxing and worry-free environment. By layering the new with the old there is a cohesive transition from the original brew house to the new Deja practice that allows the community to hold on to its heritage. By working with the building instead of against it, the facility is now a warm mingling of rustic integrity and sophisticated ingenuity with each crisp layer emphasizing the joining of past and present.
